"Dream Tending" is a book about dream work, written by Stephen Aizenstat, Ph.D. and the founding president of Pacifica Graduate Institute. The book aims at awakening the power of our dreams for healing and for living a happier life. The importance of dreams was recognized in antiquity, but dreams were practically forgotten until the year 1900 when Freud wrote "On the Interpretation of Dreams". He proposed the use of word associations to find the meaning of dreams. Jung expanded Freud's ideas, suggesting that, in addition to word association, we should expand certain dreams using amplification, a process that looks for parallels of the dream with world myths. James Hillman, one of Jung's most prominent followers, suggested a step forward; that we should try to relive our dreams. Talk to the images of the dream, make a play out of the dream and become present to the settings of the dream. In summary, use your creativity to play with your dream. *Tending Dreams* brings several exercises to help us to work with our dreams, and this makes the book an excellent practical guide to dream work. I'm Roberto Lima Netto, a Jungian.
