Customer Reviews

Holy Moly! This book is absolutely one of the best psychological thrillers I've read in a long time. As soon as I read the blurb, I knew this was going to be a cracker of a thriller... just not this good!"Every action has a reaction. Every deed has a consequence. There's always a price to pay."Family secrets can be destructive. They wedge a boulder between those who know them and those who

don't. When exposed, as happens in this book, they test a family's bond to the limit, shattering lives and relationships in the process. Alzheimer's is a terrible disease affecting the brain and bringing about hallucinations, delusions and confusion. So, how much reliable a confession made by a person suffering from this disease can be? Tom, Olivia's father-in-law, stuns everyone when he confesses to have murdered Olivia's best friend Katie, twenty-five years before. But that can't be true! The old man, has always been a gentle giant who wouldn't even kill a spider or a mouse, let alone a person. So why is he coming out with this absurd story now? Could he really have killed Katie all those years ago? Or is he just imagining everything in his confused state? But if so, how does he know where the body is buried? Thanks to Sibel's beautiful and flawless prose, reading this book was extremely enjoyable. Pages just flew by. As I was reading, I kept telling myself "Oh this is just brilliant!", especially when I reached some mind-blowing twist or turn. A well-thought out, clever plot, unwavering suspense and tension from start to finish and chapters ending in cliffhangers kept me pinned to my kindle until I had practically devoured the whole book. All characters, dialogues and locations are very realistic and vividly described.
