Customer Reviews

I read the entire book in one sitting. made me laugh, cry and feel ignorant sometimes one at a time and others all at once. great entertaining and enlightening read. for fun read it out-loud with a group of friends and see who believes what!

Wow, what a book! I just couldn't stop immediately I picked it up and read the first thing discussed! Many things I felt I knew, jumped right at me in a form I barely recognized them. We think we know many things while in reality, we don't. It's quite an interesting and entertaining book.

An awesome book! Excellent for the curious intellectual as well as casual reader. Everyone will really enjoy this book - great laughs, great head thinkers and just great facts that us humans need to

know. So many facts in one place. Would definitely recommend.

Overall I really enjoyed this book and this might be trivial but here is why I can only give this book 4 stars: To be fair I feel this way about all books that has so called facts about evolution. First of all evolution is theory not fact and after reading the so called fact at the end of the book I felt compelled to say something. The so called fact is adaptations not evolution. Living things have to adapt to survive that doesn't mean it's evolution

I liked this book because I am a trivia nut and I lo learning new things. I like the fact he isn't rehashing knowledge that you can find in countless other books. The obscure facts are the best ones.
