# Information Sources On Islamic Banking And Economics: 1980-1990

## **Synopsis**

Islamic banking and economics (IBE) is a fast-growing subject of vital interest in both East and West as Muslims change their attitudes towards investments and find ways to invest their funds according to the Islamic faith. Along with the rapid developments in Islamic banking there has been a concomitant increase in the quantity of relevant IBE material generated. Since IBE is a highly specialized cross-disciplinary field involving economics, business, marketing, religion, philosophy and culture, it is difficult for researchers to locate and obtain information without having to go through several secondary sources such as indexing and abstracting services. In this electronic age, it is essential for researchers to be aware of the various forms of information available for consultation. Yet, until now, the few previous works on IBE information sources have been limited to the coverage of materials available during the early 1980s, before the most recent period of expansion, and in addition the materials cited were often unpublished and therefore unobtainable. In answer to a long-felt need, "Information Sources on Islamic Banking and Economics" provides a detailed bibliography of IBE sources concentrating on the period 1980-1990 with some data from 1991 and 1992, and with the additional unique feature of setting out, for the first time, the information infrastructure of the IBE discipline. A comprehensive author index and a keyword subject index for important terms are provided, and only published - and therefore easily obtainable - items have been included. This book is essential reading for all researchers, economists, bankers and others who need information on the increasingly important field of Islamic banking and economics, and related areas.
