I remember reading this book in the early 1980's, a friend had it. . Printed in 1976 a great forgotten book on Sexual Astrology! They don't write them like they used to.....Also remembering how very close they got it right about My sign, so much so, that 30 years later I wondered if I could still get a copy for myself, and here it is....woohooo This 37 year old copy I got, looks New.. and I enjoyed spending hours reading about My sign, and all the others of people I know. This would be a Great party event, this book and friends hanging out, and reading each others sexual fancies that they might not even know they have hahaha watching each other blush.... fun! This book is more than a party topic, it can help you understand More about yourself, or your partner/s. Opening a deep seated feeling/s that you always wondered about but didn't know where to find it, or answer some questions about yourself/partner you didn't know how to ask. I know it did for Me. When you meet someone new, and you find out when they were born, you can read about them. Like how to get on the good side, first moves to make to your/both advantage. It gives you an idea of, can I get along

with this sign? In the long haul? This would be My concern if i liked someone and want to get closer. The book covers Each Sign with, Her sign, Her sex life...His sign, His sex life..the first moves to make, and not to make, Erogenous Zones, where to touch them, Last Moves, how to get out, then it goes on with a paragraph of each sign with each sign, exp. cancer with taurus, gives an idea of how these 2 signs can get along intimately and in a relationship. Some say, Take a grain of salt when it comes to Astrology, its for entertainment only...
