# The Neal-Schuman Library Technology Companion, Fifth Edition: A Basic Guide For Library Staff

## Synopsis

In its new fifth edition, which has been completely updated and reorganized, this one-stop overview of all technologies used in libraries today is more comprehensive and compelling than ever. The perfect primer for LIS students, Burke's guide should also be at the top of the list for any current or future library professional looking to stay at the forefront of technological advancement. It gives readers a sound and sensible way to consider, access, and use library technologies to better meet the needs of library users. Its incisive coverage includes complete analysis of the librarian's technological toolbox for teaching, security, databases, and more; expert advice on how to compare and evaluate competing technology solutions; mobile devices and technology, social media, streaming media, and privacy; makerspaces and other technology programming; updated content on open source catalog systems, discovery layers, and related elements of library management systems; a new section on learning management systems (LMS); websites, web-based services, and free information resources; improved guidance on usability; new technology predictions for the future, with tips on how to stay up to date with the latest developments; and a glossary of useful terms. Informed by a large-scale survey of librarians across the spectrum of institution types, this guide will be a true technology companion to novices and seasoned LIS professionals alike.

## Customer Reviews

Quite a mediocre text that's outdated and lacks the in-depth information you expect in a college textbook. The short sections barely scratch the surface. There's a dearth of URLs, which could point readers to more and better information. This should be an ebook with lots of links and interaction.

While I see the need to start at square one, that doesn't mean you finish at square two in a college textbook. There should be more items in the further readings section so at least we're able to find writers who have done a better job. Very expensive and disappointing.
